

Sintesi

Titolo: Research position in two projects on Smart Spaces

Descrizione:

The successful candidate will take on multiple roles in these two projects. Initially, the SSARE project will focus on project planning, requiring the candidate to gain a broad knowledge of the competences of other participating researchers in order to shape and focus the detailed work plan. Subsequently, the candidate will actively participate on research topics related to wireless communication, while still maintaining collaborations with other researchers with other competences. Within TunnelLight, the successful candidate will conduct research with other project members on an efficient network stack for wireless sensor networks in road tunnels as well as tools supporting actuation over wireless communication. The candidate is expected to have a high degree of autonomy and to work in a collaborative environment. Job requirements: - PhD (or equivalent degree) in topics related to smart spaces, networking, and/or wireless sensor networks; - good knowledge and experience with project planning; - strong research record (as demonstrated with publications in top venues); - oral and written proficiency in English; - propensity for teamwork and willingness to understand and accommodate different points of view. Additional requirements: - proficiency in Italian is desirable; - experience in WSN programming in TinyOS or Contiki. Gross salary: from 35.000 to 38.000 € per year, depending on the candidate's experience. Benefit: 28 days off per year, flexi-time, company subsidized cafeteria or meal vouchers, internal car park, welcome office support for visa formalities, accommodation, social security, etc., reductions on bank accounts, public transportation, sport, accommodation and language courses fees. Start date: from January 2014 (around 2 years and 9 months) Duration: 2 years and 9 month (to be ended by September 2016) To apply online, please send your detailed CV and cover letter (pdf format). The CV should contain a list of your publications as well as the contact information for three references. Please include in your CV your authorization for the handling of your personal information as per the Italian Personal data Protection Code, Legislative Decree 196/2003. Applications must be sent to jobs@fbk.eu Emails should have the following reference code: SSARE_2013_AM Application deadline: 15th December 2013
